

BiDi Safe

The Safetell BiDi Safe provides:

- **Deposit,**
- **Safe storage,**
- **Withdrawal, and**
- **Re-cycling of cash.**

INTRODUCTION

BiDi Safe is a cassette based, safe deposit facility with time-locked withdrawal for individual cassettes.

BiDi Safe has been designed for customers with limited space availability such as: Sub-Post Offices, CTNs, Petrol Stations, Convenience Stores and Travel Shops.

BiDi Safe is available in 3 formats, all with 20 cassettes:

- **Standard** for daily cash requirements of approximately £6,000
- **Magnum** for daily cash of up to £12,000, fitted with seismic detector mounting and strengthened door, tested to BS EN 1143-1 Class 0.
- **Magnum Plus** as above with adjacent drop-safe for deposit of excess cash and/or vouchers of value

OPERATION

Bank notes are inserted into acrylic cassettes, either all of the same denomination or a mix of denominations.

The full cassettes are loaded into the BiDi Safe one at a time through the Deposit Slot or as a stack through the security key controlled Bulk Access Door.

When the BiDi Safe operator's key is in the ON position, single cassettes can be accessed by pressing the Request button. After expiry of the factory-set time delay (normally 60 seconds), a buzzer sounds and the LED is illuminated to indicate that the withdrawal is ready. Pressing the front of the drawer releases the catch and the drawer exposes the bottom cassette from the stack.

Empty cassettes can be kept aside ready for re-use or stored in BiDi Safe by inserting them in the Deposit Slot.

Notes received by the cashier during trading hours should be inserted into an empty cassette and placed in BiDi Safe through the Deposit Slot.

After trading hours when the perimeter is secure BiDi Safe can be filled or emptied quickly by opening the security key controlled Bulk Access Door.
