protecting your customer service

RollerCash

RollerCash increases security and improves cashier efficiency. Now available with improved functionality

RollerCash is a combined cash handling and security device that allows instant deposits and time-controlled withdrawals that is now available with multi-user "DaySafe" functionality.

RollerCash - DaySafe

Your cashiers can now increase their cash holding with no increase of risk to them or the cash.

RollerCash has the advanced functionality that provides multiple cashiers access to dedicated additional funds while permitting excess funds to be deposited at the touch of a button. At all times the funds remain secure held in a safe rated unit that is certified to BS EN 1143-1 Class 1.

Example:
6 cashiers, each with 3 RollerCash sectors of 200 £20 notes equals an additional £12,000 available to each cashier.

Benefits:

- **Improved customer satisfaction – shorter queues**
- **Improved efficiency – reduced customer down-time**
- **Improved security – less main safe opening**

In addition or alternatively, keys and other valuable items can be stored in the RollerCash allowing the items to be retrieved easily when required.

Safe/Door/Cabinet keys can be securely held on site, deposited by one authorised person and available to other authorised personnel, reducing the risk of misuse and loss.
