

**StaffSafe** saves your business money through monitoring the well-being of your staff at work.

When alerted, the service allows our monitoring centre specialists to observe a situation developing and to take action; such as intervening, through high-volume deterrent messages to aggressors, or summoning emergency services.

Benefits of StaffSafe can include:

- increased staff morale, because staff know that help is on its way.
- staff confidence is increased because there are no penalties for false alarms or using the system.
- deterrent of attack or abuse of staff.
- reduction in staff turnover and sick leave and associated costs.
- significant cost savings through reduced staff double cover times.
- increased probability of recovery of goods and reduced losses.
- support in your corporate duty of care to lone workers.
