**Stand C 35, Sub postmaster Exhibition, October 20 – 21, NEC**

### **Safetell delivers open plan cash funding security – it's official!**

Safetell is the official Post Office contractor for the supply of Cash Funding Units (CFUs) for open-plan offices, which are purpose-designed to combine easy access to cash with high levels of security, while allowing instant deposits and time-controlled withdrawals. Safetell also supplies PO-approved security doors fitted as either single controlled access points or in pairs to create a secure personnel siphon.

All Safetell CFUs have the big advantage of enabling cashiers to increase or decrease their till drawer cash without leaving their workstation to access a main safe or refer to a head cashier. They provide the most convenient and secure way to deposit, withdraw and recycle cash with assured safe custody throughout the work process.

Safetell offers a complete range of CFUs and supporting systems, all backed by an outstanding service network that provides comprehensive after-sales support and user peace of mind nationwide. This was proven positive when engineers serviced a post office stricken by the recent floods within a day of the water receding.

Four Safetell CFU models cost-effectively cater to servicing different levels of daily cash throughput requirements: the 'Bidisafe' for up to £6,000, Bidisafe Magnum for up to £12,000, the Rollercash for £20,000 and the Rollercash Trio for up to £30,000. Normal practice is keeping relatively small cash floats in a Flip Top Till with deposits to or topping-up from the CFU. This restricts any potential theft to a limited sum.

*ENDS*

***Notes to Editors:***

Established 1987, Safetell Ltd offers physical security for the safety of personnel and the protection of equipment and assets. The ISO 9000 firm has installed thousands of successful security solutions and has established a singular expertise in safety solutions where staff meet and interact with the public, including open-plan counters combined with security systems to provide accessibility for all and instant protection while improving workplace efficiency.

Safetell has developed and offers a wide range of products including security screens, cash handling, audio assistance & privacy equipment and modular counterwork for a variety of risk scenarios. Safetell's unique design capability allows them to develop and deliver tailored solutions to clients' individual needs, supplying design-to-installation solutions and national maintenance support.

Safetell helps organisations rise to the challenges of legislation such as the Disability Discrimination Act 1995 and the Management of Health and Safety at Work Regulations 1992.
