BidiSafe Duo

BidiSafe Duo

Introduction

Safetell BidiSafe Duo is two cash handling devices in one. The upper portion is a secure handling device that allows the deposit and time controlled withdrawal of cash at the cashier position, through use of either a BidiSafe or Magnum Cash Funding unit. The lower portion is a dropsafe.

As with BidiSafe and Magnum cash recycling units, Duo facilitates the reduction of cash held in the till. It reduces the need to access the main safe, and the need for the cashier to leave the service position; it also minimizes the transportation of bulk cash between tills and main safe. Additionally Duo allows for overnight cash drops at the service position by use of the dropsafe.

Installation

Safetell offers project management and nationwide installation as contracted.

Options

- Standard – BidiSafe upper portion (15 cassette capacity)
- Optional – Magnum upper portion (20 cassette capacity)
