CityWall Ballistic Walling

CityWall - Ballistic Walling

Introduction

Defend and protect with **CityWall - Ballistic Walling**, the leading asset and monetary protection solution. CityWall is the perfect modular safeguard for protecting large quantities of cash (ATM's) and other products and assets in need of high security, and can be retrofitted to secure existing walling as well as create modular enclosures. CityWall is offered in two thicknesses, CityWall 100 and CityWall Plus.

Design and Installation

Constructed from Zintec Steel, Steel Armour and Rockwool Insulation, CityWall is built with a flexible and modular design in mind. Both models of CityWall can be fashioned to your custom-specification, and can function as both wall enhancement and complete enclosures.

Panel sizes of 1200mm, 900mm, 600mm and 300mm are standard with custom panel sizes available to suit room layout dimensions. During the manufacturing process, it is possible to specify apertures for ATM's.

CityWall can be finished in a multitude of ways, including untouched plain steel, wet sprayed, brick slips or powder-coated to match corporate colours.

Site assembly and installation is very simple; allowing for relocation and easy expansion without any major building works or disruption to trade. No welding techniques required.

Model Comparison

	Panel Thickness	Panel Weight
CityWall 100	50mm	84kg/m2
CityWall Plus	80mm	123kg/m2

Additional Options

- A variety of High Security Doors are available, alongside products such as Bulk Transfer Units
- Lighting and alarms systems, canopies and security ceilings

Certification

- Offers protection for Physical Attack to the level of NF XP ENV1627 to L3 and L4 and for Ballistic Attack to Tested to FB4 of EN1522 and G2 / S86 of the British Standard BS 5051 – Part 1 1988, covering three ballistic impacts
- The inner core mineral wool insulation offers a thermal conductivity value of 0.037 W/mK and a thermal resistance is 2m² K/W

FEATURES

- Modular design allows for quick and easy assembly and reduces on-site labour
- Built with virtually no disruption to trading and easily dismantled for relocation
- Lightweight materials compared to traditional construction materials
- CityWall can be finished to match an assortment of corporate styles.
- Suitable for internal & external use

APPLICATIONS

- Banking, cash handling and secure storage facilities
- Security, military, panic rooms, and railway control / switch gear rooms
