## //STAFFLINE

Safetell Staffline doors are designed for internal and customer facing use to provide combinations of bullet, fire, and manual attack resistance in a single door

### Dimensions

Range Height: 1,800mm to 2,400mm  
Range Width: 700mm to 1,200mm

Frame Depth: 115mm

### Weight

Bullet Resistant BS5051G2 Version 140 kg

Manual Attack Version 100 kg

### Resistance

Standard Bullet Resistance BS5051 G2 and S86  
Optional Bullet Resistance - as client specification

Fire Resistance - EN1634 57minutes

### Opening

Standard opening is outward towards the attack side

Optional uncertificated inward opening doors are possible but not recommended unless there is no alternative

### Construction

- The door leaf and frame are fabricated from timber and composite materials to match the required bullet and or manual attack resistance levels required
- The door leaf is hung on heavy duty hinges, that include dogbolts
- Standard outward opening Staffline doors are fitted with a 'T' section to protect the leading edge of the door

### Locking

- Standard lock is a Chubb 3R35 keylock
- Optional uncertificated locks are available including multiple locks that can be 'keyed alike', 'keyed to differ' and or restricted series keysets
- Optional uncertificated electric strike or magnetic lock can be fitted to Staffline doors as agreed to meet project requirement prior to order

### Door Furniture

- Standard Staffline doors are supplied without kick plates or push plates
- Optional kick plates and push plates are available, to be fitted on either or both door leaf faces
- Optional 'D' handles are available, to be fitted on either or both faces

### Vision Panels & Eye Viewer

- Standard Staffline doors are supplied without vision panels or eye viewer
- Optional eye viewer is available
- Optional single or multiple vision panels with or without vertical venetian reflector strips, to obscure public view, are available. Sizes and positions of vision panels are typically made to client requirement

### Finishes

- Timber standard finish is American White Oak
- Optional timber finishes are available - call Safetell
- Optional primed and site finish are also available - call Safetell
- Standard 'T' Section finish is stainless steel
- Optional 'T' Section finishes are polyester powder coated to RAL Colour
- Optional kick plate and push plates are grained stainless steel finish
- Optional vision panel panel frame finishes are either grained stainless steel finish or polyester powder coated to a RAL colour

### Door Closers

- Standard Staffline doors are fitted with a door closer designed to provide automatic door closure for heavy commercial use

### Door Automation and Remote Locking Integration

- Standard Staffline doors are supplied without any automated door opening
- Optional automated door opening and remote locking integration is available, usually to control access to certain secure areas, or to form part of an interlocking door portal or some other operational requirement, call Safetell to discuss your requirement

### Single, Double, and 1.5 Leaf Variants

- Standard certificated Staffline doors are single leaf and frames
- Optional uncertificated double leaf Staffline doors and frame are available, subject to limitations in attack resistance, call Safetell to discuss your requirement
- Optional uncertificated single leaf and part leaf combination door and frame are available, subject to limitations in attack resistance, call Safetell to discuss your requirement

# HELPING SECURE YOUR ORGANISATION

With 30 years of security expertise, Safetell has worked on a vast number of projects throughout the years with an emphasis on providing the best products and bespoke solutions possible, with strong relationships formed across a wide number of sectors, from customer-facing environments such as banks, building societies, corporate offices and high end retailers to private and specialist facilities, such as data centres, schools and hospitals.
