CONSTRUCTION

Armoured steel framework with counterwork to match requirement

DATASHEET

BULLET RESISTANT GLAZING AND COUNTERS

Working as a first-defence against ballistic attack, the screen and counterwork are designed to provide a seamless line of ballistic protection from floor to ceiling. Typical applications are banks, building societies, government offices, cash office or any application where there is a serious risk of firearm attack or robbery.

MAIN FEATURES

- Integral counter armour plating that is concealed and unobtrusive
- Screens and counters are available in single, double and three tier versions for compliance with DDA regulations
- Can be manufactured to include a very wide range of sizes, materials and finishes to obtain the required corporate appearance
- A bespoke design process that allows for you to specify your counter and glazing every step of the way
- Easy and simple incorporation with products, such as Cash Scoops and Speech Transfer devices

OPTIONAL

- Typically includes electronic speech transfer, also available with natural speech transfer
- A wide range of bullet resistant Cash Scoops are available
- Can be designed to incorporate Meridian Bulk Item Transfer Units
