

AUTOMATIC DOOR

SERVICE & MAINTENANCE

Routine maintenance is essential to ensure your automatic doors remain in working order, without downtime affecting your business. Avoid this risk and any costly, unplanned, emergency expenditure, by getting your equipment serviced and maintained regularly by Safetell.

We carry out maintenance in line with the original equipment manufacturers' recommendations. This is critical to safety and will increase the life, value and performance of your automatic door system. This includes a cost-effective programme of regular inspections and a prompt repair service when applicable to keep it SAFE.

Standard PMCOs (Preventative Maintenance Call Outs) include:

- One or more visits per annum subject to usage
- Free safety check to ensure compliance with EN16005
- Basic adjustments required to ensure doors are working
- Correction of any faults (closing speeds, sensors, backcheck and latching)
- A survey reporting any major defects or upgrades required for safe & correct use
- Access to 24/7 service call centre
- Free logbook
- Parts chargeable or inclusive
- Reactive calls chargeable or inclusive, with emergency response times from 4 hours

WHY CHOOSE SAFETELL?

We champion a repair, not replace approach and utilise our many years of experience and expertise to deliver the very best value for our customers.

- We are an ADSA member company with trained and qualified engineers to all relevant standards including BS EN16005
- Nationwide coverage and 24/7 helpdesk support
- Our engineers hold UKPIA/SPA Safety Passports, required for work on petrol filling stations
- Directly employed BS 7858 security vetted engineers
- Multiple technologies combined to provide an integrated solution for our clients
- Real-time vehicle location tracking, for realistic response times
