SAFETELL SECURITY PORTALS

CIRCLE PORTALS

A high security solution to control entry and exit to internal secure areas. Available as circle, square and larger DDA units to meet existing building aesthetics and client needs. Our Security Portals offer single person passage checking and abandoned object detection systems with range of passage widths available, including a DDA approved wide version. Available with a range of security resistance levels including EN1627 RC4 Manual Attack rating and up to BR4 EN1063 Ballistic Rating. Our Security Portals are designed to be integrated with any access control system.

MAIN FEATURES

- SA247 and SA248 are pre-built, SA249 is a removable structure
- Weighing floor system (abandoned object detection, weight higher than 200 grams)
- Single person detection (anti-hostage system)
- Paint finish is embossed, according to RAL colour scale, or Stainless Steel covering
- Traffic light panels & multilingual automated voiceover for transit communications
- Portal console with digital display and menu-guided commands
- Throughput is dependant on model and accessories

OPTIONAL

- Emergency exit management
